

INDEX TO VOLUME 86

INDEX TO NAMES

A

- Adcock, B., et al.** Characterisation of amines, 615.
Ader, D., et al. Rapid detmn. of beryllium. Paper-chromatographic method, 125.
Afonso, O. R., et al. Paper Electrophoresis: Review of Methods and Results. (Publication received), 364.
Aghina, L. Dizionario Tecnico Italiano-Inglese con Particolare Riferimento alla Industria Chimica. (Publication received), 206.
Ahrens, L. H., et al. Spectrochemical Analysis. 2nd Edn. (Publication received), 428; (Review), 760.
Albert-Recht, F. Rocking extractor; ultrafiltration apparatus; sample cell arrangement for E.E.L. flame photometer; Electrophoretic tank for small-scale cellulose acetate strips. (Demonstrations), 280, 281.
Alberty, R. A., et al. Physical Chemistry. (Publication received), 492.
Alkmade, C. Th. J., et al. Flammenphotometrie. 2nd Edn. (Publication received), 427.
Allan, J. E. Detmng. zinc in agricultural materials by atomic-absorption spectrophotometry, 530.
Allen, D. G. Obituary, 145.
Allport, N. L. Obituary of W. H. Simmons, 213.
 — Review of Schultz and Zymalkowski's *Quantitative Bestimmung der Alkaloide in Drogen und Drogenzubereitungen*, 78.
 — Review of Wallis's *Textbook of Pharmacognosy*. 4th Edn., 141.
Alon, A., et al. Rapid detmn. of beryllium. Paper-chromatographic method, 125.
Ambrose, B. A., et al. Gas Chromatography. (Publication received), 859.
Ambrose, D., et al. Gas Chromatography. (Publication received), 859.
Amos, A. J. Pure Food and Pure Food Legislation. (Publication received), 205; (Review), 490.
Anders, E. Radiochemistry of Technetium. (Publication received), 427; (Review), 763.
Andrew, T. E., et al. Detmng. zinc in zinc manganese ferrite and other ferrites, 676.
Antia, M. B., et al. Thioformanilide as precipitant for metal sulphides: Qualitative approach, 202.
Arnaud, F. W. F. Obituary, 287.
Arora, R. C., et al. Thioformanilide as precipitant for metal sulphides: Qualitative approach, 202.
Ashbrook, A. W., et al. Volumetric detmn. of sulphate, 740.
Ashmore, P. G. Principles of Chemical Equilibrium. (Publication received), 628.
Athavale, V. T., et al. Polarographic detmn. of antimony in refined lead, 399.
Atkins, H. J. B. Tools of Biological Research. 3rd Series. (Publication received), 628; (Review), 859.
Avent, A. G. Presence of acrolein in Rhine wine Liebfraumilch 1959, 479.
Ayres, D. C. Review of Veibel's *Identification of Organic Compounds*. 5th Edn. (2nd English Edn.), 681.

B

- Bacharach, A. L.** Review of Gale's *Synthesis and Organisation in the Bacterial Cell*, 425.
 — Review of McCance and Widdowson's *Composition of Foods*, 552.
 — **et al.** Hormones in Blood. (Publication received), 764.
Bacon, A. Obituary, 287.
Badman, H. G., et al. Detmng. ^{14}C and ^{32}P in animal tissue and blood fractions by liquid-scintillation, 342.
Baggesgaard-Rasmussen, H. Obituary, 1, 287.
Bailey, P. H., et al. Co-precipitation of cobalt with chromium and aluminium hydroxides in qualitative analysis, 485.
Baker, B. E., et al. Interference by chloride ion in detmng. tryptophan by Shaw and McFarlane's method, 416.
Ballentyne, D. W. G., et al. Dictionary of Named Effects and Laws in Chemistry, Physics and Mathematics. 2nd Edn. (Publication received), 206.
Ballou, N. E., et al. Radiochemistry of Molybdenum. (Review), 763.
Banerjee, N. G., et al. Rapid complexometric detmn. of phosphorus in coal, 195.
Barker, C. J. Simple gas chromatograph. (Demonstration), 281.
Barnard, G. P. Review of Beynon's *Mass Spectrometry and its Applications to Organic Chemistry*, 422.
Bartlett, J. C. Fluoride content of gelatin, 200.
Bayer, E. Gas Chromatography. (Publication received), 427; (Review), 683.
Beard, H. C. Radiochemistry of Arsenic. (Review), 763.
Beaven, G. H., et al. Molecular Spectroscopy: Methods and Applications in Chemistry. (Publication received), 764.
Beckett, A. H., et al. Titration in Non-Aqueous Solvents. 3rd Edn. (Publication received), 80; (Review), 274.
Beers, R. F., et al. Polynucleotides: Natural and Synthetic Nucleic Acids. (Publication received), 427; (Review), 760.
Belcher, R. Obituary of D. F. Phillips, 214.
Bender, A. E. Anticoprophagic cup—"Faecollector"—for rat. (Demonstration), 278.
Bennett, H., et al. Apparent loss of iron during fusion of silicate materials with sodium hydroxide in nickel crucibles, 135.
Bentley, H. R., et al. Cigarette Smoke Condensate: Preparation and Laboratory Estimation. 2nd Edn. (Publication received), 492.
Berl, W. G. Physical Methods in Chemical Analysis. Vol. IV. (Publication received), 860.
Bethel, M. M., et al. Iodimetric methods of assay for penicillin in fermented medium, 448.
Bevington, J. C. Radical Polymerization. (Publication received), 684.
Beynon, J. H. Mass Spectrometry and its Applications to Organic Chemistry. (Review), 422.

- Bhaduri, B. P., et al.** Rapid complexometric detmn. of phosphorus in coal, 195.
- Bhatnagar, R. P., et al.** Thioformanilide as precipitant for metal sulphides: Qualitative approach, 202.
- Bhattacharyya, A. C., et al.** Rapid complexometric detmn. of phosphorus in coal, 195.
- Bilefield, L. I., et al.** Detmng. cadmium in rocks by neutron-activation analysis, 386.
- Bishop, E.** Microcoulometry; electronic constant-current/constant-potential source. (Demonstrations), 280.
- **Obituary of H. T. S. Britton**, 146.
- Bishop, J. M.** Measuring oxygen tension of blood by covered platinum electrode. (Summary), 212.
- Bishop, J. R., et al.** Apparatus for coulometric detmns. of free tin and tin-iron alloy on tinplate. (Demonstration), 281.
- Blinn, R. C., et al.** Indirect ultra-violet spectrophotometric detmn. of sulphur dioxide by plumbous ion, 675.
- Eloch, K.** Lipide Metabolism. (Publication received), 427.
- Blout, E. R., et al.** Symposium on Microstructure of Proteins. (Publication received), 684.
- Bloxam, T. W.** Photometric detmn. of silica in rocks and refractory materials, 420.
- Bolton, H. L., et al.** Collaborative work on detmng. alkylbenzenesulphonates in sewage, sewage effluent, river waters and surface waters, 719.
- Bond, C. R., et al.** Iodimetric methods of assay for penicillin in fermented medium, 448.
- Borrowdale, J., et al.** Absorptiometric detmn. of boron, 489.
- Bourne, G. H.** World Review of Nutrition and Dietetics. Vol. 2. (Publication received), 364.
- Bowen, H. J. M., et al.** Detmng. sodium, potassium and phosphorus in biological material by radioactivation, 506.
- Bowles, P. F., et al.** Colorimetric detmn. of copper in sea water solutions, 483.
- Bracewell, G. A.** Obituary, 145.
- Bradfield, E. G.** Rapid detmn. of magnesium in plant material, 269.
- Brazenall, P., et al.** Colorimetric detmn. of copper with zinc *OO*-di-isopropyl phosphorodithioate, 407.
- Brealey, L.** Review of Dean's *Flame Photometry*, 204.
- Review of Strobel's *Chemical Instrumentation*, 273.
- Brenner, N., et al.** Gas Chromatography: Second International Symposium Held Under the Auspices of the Analysis Instrumentation Division of the Instrument Society of America, June, 1959. (Publication received), 364.
- Bridge, E. P., et al.** Spectrographic detmn. of trace impurities in gallium, 267.
- Bridge, J., et al.** Colorimetric detmn. of copper with zinc *OO*-di-isopropyl phosphorodithioate, 407.
- Brierley, A., et al.** Detmng. phenothiazine in commercial preparations by ultra-violet absorption spectroscopy, 709.
- Briggs, R., et al.** Wide-bore dropping-mercury electrode for detmng. dissolved oxygen and oxygen in gases, 603.
- Briscoe, H. V. A.** Obituary, 767.
- Britton, H. T. S.** Obituary, 81, 146.
- Britton, S. C., et al.** Tinplate Testing: Chemical and Physical Methods. (Review), 204.
- Broadbank, R. W. C., et al.** Co-precipitation of cobalt with chromium and aluminium hydroxides in qualitative analysis, 485.
- Brochmann-Hanssen, E., et al.** Pharmaceutical Analysis. (Publication received), 684.
- Broda, E.** Radioactive Isotopes in Biochemistry. (Publication received), 80; (Review), 274.
- Brodaty, E.** Obituary, 287.
- Bromley, D. E.** X-ray fluorescence in general analysis. (Summary), 283.
- Brown, J. F.** Review of *Chemical Plant Instrumentation: Notes on Use of Measuring Instruments*, 79.
- Brown, W. O., et al.** Detmng. ^{14}C and ^{32}P in animal tissue and blood fractions by liquid-scintillation, 342.
- Brownlee, J. L., jun.** Radiochemistry of Vanadium. (Publication received), 492; (Review), 763.
- Buchan, J. L., et al.** Selective desorption from carbon columns for detmng. maltotriose in starch conversion products, 160.
- Burden, E. H. W. J.** Toxicology of nitrates and nitrites with particular reference to potability of water supplies: review, 429.
- Burgan, J. G., et al.** Cigarette Smoke Condensate: Preparation and Laboratory Estimation. 2nd Edn. (Publication received), 492.
- Burroughs, L. F., et al.** Iodimetric detmn. of acetaldehyde bisulphite, 381.
- Busev, A. I., et al.** Use of Organic Reagents in Inorganic Analysis. Translated by J. T. Greaves. (Review), 273.
- Butterworth, D.** Induction heating applied to micro-detmn. of carbon and hydrogen. (Demonstration), 279.
- Induction heating in detmns. of carbon and hydrogen, 357.
- Butz, W. H., et al.** Instrumental Methods for Analysis of Food Additives. (Publication received), 860.

C

- Cadenas, R. A., et al.** Chromatographic reagents for organic substances, 132.
- Calderbank, A., et al.** Detmng. diquat residues in potato tubers, 569.
- Campbell, E. P.** Obituary, 429.
- Campan, W. A. C., et al.** Quinoline phosphomolybdate method for detmng. phosphate: applicability in international trade, 467.
- Camps, F. E.** Medicine, Science and the Law. Vol. I, No. 1, Oct., 1960. (Publication received), 80; (Review), 362.
- Carlos, A. S.** Obituary, 287.
- Carr, A. D., et al.** Detmng. small amounts of amine in aqueous solution, 335.
- Carruthers, W., et al.** Progress in Organic Chemistry. Vol. 5. (Publication received), 628.
- Carson, R.** Ion-exchange separation and polarographic detmn. of small amounts of lead and zinc in presence of cobalt, 198; Erratum, 492.
- Carter, D. V.** Diffusion plate-assay technique applied to enzymes and antibacterials in pharmaceutical analysis. (Demonstration), 282.
- Cartmell, E., et al.** Valency and Molecular Structure. 2nd Edn. (Publication received), 684.
- Cartwright, P. F. S.** Precipitation from homogeneous solution by cation release at constant pH. I. Oxidation of EDTA solution by hydrogen peroxide, 688; II. Precipitation of metal phosphates, 692.
- Casson, C. E., et al.** Enzymic hydrolysis of phospholipids for detmng. egg in foods, 544; Erratum, 628.
- Catch, J. R.** Carbon-14 Compounds. (Publication received), 764.

- Cathro, K. J.** Detmng. gold in mill products by cathode-ray polarograph, 657.
- Caverly, D., et al.** Modified colorimetric detmn. of phosphorus applied to organo-phosphorus insecticide residues, 478.
- Cawse, P. A., et al.** Detmng. sodium, potassium and phosphorus in biological material by radioactivation, 506.
- Chalmers, R. A.** Seldom-remembered aspects of analytical technique. (Summary), 765.
- Chambers, R. D., et al.** Semi-micro detmn. of fluorine and chlorine in organic compounds. IV, 356.
- Chandler, R. D. T. E.** Obituary, 287.
- Charlot, G.** Analyse Qualitative Rapide des Cations et des Anions. 3rd Edn. (Publication received), 206; (Review), 425.
- *Méthodes de la Chimie Analytique: Analyse Quantitative Minérale*. 4th Edn. (Publication received), 428; (Review), 762.
- Cheeseman, G. W. H., et al.** Characterising organic acids by benzylamine salts, 256.
- Chilton, J. P.** Principles of Metallic Corrosion. (Publication received), 492.
- Chilwell, E. D., et al.** Detmng. residual organo-phosphorus insecticides in foodstuffs: Review, 148.
- Chirside, R. C.** Address of Retiring President. Enlargement of horizons in analytical chemistry, 314.
- Choppin, G. R.** Cross-Referenced Index of Radiochemical Teaching Experiments Applicable to Chemistry. (Publication received), 684.
- *Radiochemistry of Rhodium*. (Review), 763.
- Čihálek, J.** Potentiometrie. (Publication received), 684.
- Clabaugh, W. S.** Reagent Chemicals: American Chemical Society Specifications, 1960. (Publication received), 556; (Review), 858.
- Claremont, C. L. L.** Obituary, 685.
- Clark, A.** Simple and inexpensive fraction collector for chromatography, 548.
- Clark, G. L.** Encyclopedia of Spectroscopy. (Publication received), 206.
- Clegg, J. B.** Sulphometer. (Demonstration), 279.
- Cleuy, H. J.** Review of *Monographs on Radiochemistry of the Elements*, 763.
- Coates, G. E.** Organo-Metallic Compounds. 2nd Edn. (Review), 624.
- Cockburn, T.** Obituary, 629.
- Codd, L. W., et al.** Crystallography. (Publication received), 860.
- Coleman, R. F.** Detmng. trace elements by fast-neutron activation analysis, 39.
- Comrie, A. A. D.** Review of Hudson's *Development of Brewing Analysis*, 272.
- Cook, J. W., et al.** Progress in Organic Chemistry. Vol. 5. (Publication received), 628.
- Cook, R. P.** Reactions of steroids with acetic anhydride and sulphuric acid (Liebermann-Burchard test), 373.
- Cooper, B. S.** Review of Cosslett and Nixon's *X-ray Microscopy*, 423.
- Review of *VIII Colloquium Spectroscopicum Internationale*, 274.
- Corliss, C. H., et al.** Tables of Spectral-Line Intensities. Part II. (Publication received), 860.
- Cosslett, V. E., et al.** X-ray Microscopy. (Publication received), 142; (Review), 423.
- Cousin, B., et al.** Méthodes Sélectionnées de Micro-analyse Organique Quantitative. Vol. I. (Publication received), 764.
- Cowan, G. A., et al.** Radiochemistry of Fluorine, Chlorine, Bromine and Iodine. (Review), 763.
- Cox, S. J., et al.** Anhydrous sodium carbonate as acidimetric standard, 464.
- Crompton, T. R.** Detmng. alkoxide groups in organo-aluminium compounds, 652.
- Curry, D. R., et al.** Punched-card index of analytical bibliography. (Demonstration), 279.

D

- Dahlgren, S.-E.** Eliminating interfering citrate and mineral acids in spectrophotometric detmn. of phosphorus in fertilisers, 814.
- Dalladay, D. B., et al.** Detmng. copper in platinum jewellery alloys, 418.
- Daly, C.** Simplified spectrophotometric assay of griseofulvin in fermentation samples, 129.
- Daniel, J. W.** Detmng. aromatic amino-compounds, 640.
- Daniels, F., et al.** Physical Chemistry. 2nd Edn. (Publication received), 492.
- Darmois, E., et al.** Electrochimie Théorique. (Review), 205.
- Darmois, G., et al.** Electrochimie Théorique. (Review), 205.
- David, D. J.** Detmng. molybdenum by atomic-absorption spectrophotometry, 730.
- Davidson, J. N.** Review of Steiner and Beers' *Polynucleotides: Natural and Synthetic Nucleic Acids*, 760.
- Davies, A. G.** Organic Peroxides. (Publication received), 764.
- Davies, R., et al.** Automatic detmn. of penicillin in fermentation broth: iodimetric assay, 326.
- De, A. K.** Separation of Heavy Metals. (Publication received), 764.
- Dean, G. A., et al.** Aspects of pipette usage. I, 434; II, 440.
- Separating vanadium and chromium from iron by extraction of ferric chloride with di-isopropyl ether, 106.
- Dean, J. A.** Flame Photometry. (Review), 204.
- de Boer, J. H., et al.** Mechanism of Heterogeneous Catalysis. (Publication received), 364.
- Deferrari, J. O., et al.** Chromatographic reagents for organic substances, 132.
- de Rooy, C., et al.** Chromatographic behaviour of 2,4-dinitrophenylhydrazones on chromatoplates, 74.
- Thin-layer chromatography of 3,5-dinitrobenzoates, 527.
- de Rossi, P., et al.** Assay of antibiotic mixtures using electrophoresis in agar. (Demonstration), 279.
- Desoutter, D. M.** Research and Development for Industry. Vol. I, No. 1, Sept., 1961. (Publication received), 684.
- DeVoe, J. R.** Radioactive Contamination of Materials Used in Scientific Research. (Publication received), 492.
- Radiochemistry of Cadmium. (Review), 763.
- Dewedar, A., et al.** Zone-strip technique, 744.
- Dhaneshwar, R. G., et al.** Automatic pre-heating self-flushing water still; potentiometric titrimetry; differential electrolytic potentiometry; needle-valve weight burette. (Demonstrations), 280.
- Polarographic detmn. of antimony in refined lead, 399.
- Dhont, J. H., et al.** Chromatographic behaviour of 2,4-dinitrophenylhydrazones on chromatoplates, 74.
- Thin-layer chromatography of 3,5-dinitrobenzoates, 527.
- Dickes, G. J., et al.** Detmng. microgram amounts of sulphur-containing compounds, 69.

- Dixon, J. P.** Micro-detmn. of sulphur in organic compounds, 597.
Dixon, S. Obituary of T. Tickle, 214.
Doležal, J., et al. Polarometrické Titrace. (Publication received), 364.
Donaldson, J. D., et al. Primary standards in tin analysis, 619.
Downie, T. C., et al. Titrimetric Analysis: Introductory Course. (Publication received), 628.
Drewes, S. E. Analysing lead tannate and related chelates by amperometric method, 104.
Drewry, J., et al. Colorimetric detmn. of uranium in phosphate rock after extraction with alkyl acid phosphates, 178.
Dyer, F. F., et al. Radiochemistry of Copper. (Publication received), 428; (Review), 763.
Dymock, J. F., et al. Detmng. nitrite in water, 414.

E

- Eardley, R. P., et al.** Apparent loss of iron during fusion of silicate materials with sodium hydroxide in nickel crucibles, 135.
Eldridge, A. A. Obituary of H. V. A. Briscoe, 767.
Elliott, G., et al. Benzoin method for fluorimetric detmn. of boron, 62.

INDEX TO SUBJECTS

A

- Acetaldehyde:** Application of spectrophotometric analytical technique in kinetic study (detmng. —). Holder, 677.
- Acetaldehyde bisulphite:** Iodimetric detmn. of —. Burroughs and Sparks, 381.
- Acetophenetidin:** Separating mixtures of drugs by combination of chromatography and ionophoresis on cellulosic ion-exchange sheets. Street and Niyogi, 671.
- p-Acetylaminophenol:** Separating mixtures of drugs by combination of chromatography and ionophoresis on cellulosic ion-exchange sheets. Street and Niyogi, 671.
- N-Acetyl-D-glucosamine:** Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.
- Acids, organic:** Characterising — by benzylamine salts. Cheeseman and Poller, 256.
organic: Micro-quantitative analysis by zone-strip technique. Shimi, el Dein and Imam, 535.
organic: Silica gel chromatography of — from plant tissue. Wager and Isherwood, 260.
- Acrolein:** Presence of — in Rhine wine Liebraumilch 1959. Avent, 479.
- Actinium:** Radiochemistry of the Rare Earths, Scandium, Yttrium, and —. Stevenson and Nervik. (Publication received), 427; (Review), 763.
- Actinomycetes.** Vol. II. Classification, Identification and Description of Genera and Species. Waksman. (Publication received), 859.
- Adrenaline:** Formaldehyde-treated alginic acid in chromatographic detmn. of organic bases. Foster and Murfin, 32.
Micro-quantitative analysis by zone-strip technique. Shimi, el Dein and Imam, 535.
- Adsorbents:** 'Union Carbide' Molecular Sieves for Selective Adsorption. British Drug Houses Ltd. 2nd Edn. (Publication received), 860.
- Advisory Committee on Poisonous Substances Used in Agriculture and Food Storage.** Scientific Sub-Committee, Joint Mercury Residues Panel. Recommended methods of analysis of pesticide residues in foodstuffs. Detmng. mercury residues in apples and tomatoes, 608.
- Agriculture:** Australian Journal of Experimental — and Animal Husbandry. Vol. I, No. 1, May, 1961. (Publication received), 556.
- Alcohol:** See **Ethyl alcohol**.
- Alcohols:** Thin-layer chromatography of 3,5-dinitrobenzoates. Dhont and de Rooy, 527.
- Aldehydes:** Chromatographic behaviour of 2,4-dinitrophenylhydrazones on chromatoplates. Dhont and de Rooy, 74.
- Aldrin:** Rapid identification and detmn. of residues of chlorinated pesticides in crops by gas-liquid chromatography. Goodwin, Goulden and Reynolds, 697.
- Alginic acid:** Formaldehyde-treated — in chromatographic detmn. of organic bases. Foster and Murfin, 32.
- Alkaloids:** Identifying small amounts of bases in urine by infra-red spectrophotometry. Morgan, 631.
Quantitative Bestimmung der Alkaloide in Drogen und Drogenzubereitungen. Schultz and Zymalkowski. (Review), 78.
- Alkoxide groups:** Detmng. — in organo-aluminium compounds. Crompton, 652.
- Alkylbenzenesulphonates:** Collaborative work on detmng. — in sewage, sewage effluent, river waters and surface waters. Bolton, Webster and Hilton, 719.
Detmng. biologically soft and hard — in detergents and sewage. Ogden, Webster and Halliday, 22.
- Aluminium:** Colorimetric detmn. of tin in propellants by haematoxylin (and detmng. —). Norwitz, 835.
compounds: Detmng. alkoxide groups in organo-aluminium compounds. Crompton, 652.
Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
Direct spectrographic analysis of plant ash. Thompson, 829.
Radiochemistry of — and Gallium. Lewis. (Publication received), 556.

- Illuminator-box for large plate microbiological assays. Naylor. (Demonstration), 282.
- Anticoprophagic cup** ("Faecollector") for rat. Bender. (Demonstration), 278.
- Antimony**: Colorimetric detmn. of tin in propellants by haematoxylin (and detmg. —). Norwitz, 835.
- Detmg. trace elements by fast-neutron activation analysis. Coleman, 39.
- Polarographic detmn. of — in refined lead. Athavale, Dhaneshwar, Mehta and Sundaresan, 399.
- Radiochemistry of —. Maack. (Publication received), 627.
- Antipyrin**: See 2,3-Dimethyl-1-phenylpyrazol-5-one.
- Apparatus**: Advances in Analytical Chemistry and Instrumentation. Vol. I. Reilly. (Publication received), 205.

Apparatus—continued

- Agar-gel plate immunoanalysis. Feinberg and Temple. (Demonstration), 279.
- Anti-coincidence β -scintillation counter for low activity levels. Waddingham and Rowe. (Demonstration), 281.
- Anticoprophagic cup—"Faecollector"—for rat. Bender. (Demonstration), 278.
- Applications of gas-liquid chromatography. Haslam, Jeffs and Willis, 44.
- A.R.D.E. card sorting/punching machine. Lonergan. (Demonstration), 279.
- Aspects of pipette usage. Part I. Precision. Dean and Herringshaw, 434; Part II. Effects of variables, 440.
- Assay of antibiotic mixtures using electrophoresis in agar. Lightbown and de Rossi. (Demonstration), 279.
- Atomiser for flame photometry, constructed in transparent plastic. Still. (Demonstration), 278.
- Automatic detmn. of penicillin in fermentation broth: iodimetric assay. Goodall and Davies, 326.
- Automatic integrator for gas chromatography. Konrath. (Demonstration), 278.
- Automatic micronitrometer. Watt. (Demonstration), 281.
- Automatic pre-heating self-flushing water still. Dhaneshwar and Short. (Demonstration), 280.
- By-pass injector for gas chromatography. Kipping and Jeffery, 680.
- Chemical Instrumentation. Strobel. (Review), 273.
- Chemical Plant Instrumentation: Notes on Use of Measuring Instruments. Association of British Chemical Manufacturers. (Review), 79.
- Coincidence scintillation counting for low activity levels. Waddingham and Rowe. (Demonstration), 281.
- Combustion of organic compounds by ignition in oxygen: detmg. carbon and hydrogen. Ingram, 411.
- Compensation for temperature variations in cell of dissolved-oxygen indicator/recorder incorporating wide-bore dropping-mercury electrode. Littlewood, 359.
- Coulometric methods in analysis: review. Lewis, 494.
- Desiccator seal ring. Watt. (Demonstration), 281.
- Detmg. alkoxide groups in organo-aluminium compounds (— for sampling and for decomposition). Crompton, 652.
- Detmg. dihydroxybenzenes by liquid-liquid partition chromatography. Young, 520.
- Detmg. dithionate, sulphite and sulphate in manganese leach liquors. Soffer, 843.
- Detmg. impurities in chlorine gas by gas chromatography. Lacy and Woolmington, 350.
- Detmg. microgram amounts of sulphur-containing compounds. Skerrett and Dicks, 69.
- Detmg. molybdenum by atomic-absorption spectrophotometry. David, 730.
- Detmg. oxalic acid in urine (extraction —). Hodgkinson and Zarembski, 16.
- Detmg. phenothiazine in commercial preparations by ultra-violet absorption spectroscopy (chromatographic tube). Brierley and Langbridge, 709.
- Detmg. propane-1,3-diol in glycerol by gas chromatography with flame-ionisation detector. Murray and Williams, 849.
- Detmg. thiamine in cereal products (blow-off tube). Ridyard, 723.

Apparatus—continued

- Detmng. water in plastic materials. Reid and Turner, 36.
- Differential electrolytic potentiometry. Dhaneshwar and Short. (Demonstration), 280.
- Drying small liquid samples. Wager, 266.
- Electrodes and cells for polarography. Lamb and Konczak. (Demonstration), 280.
- Electronic constant-current/constant-potential source. Bishop. (Demonstration), 280.
- Electrophoresis —. Nelson. (Demonstration), 282.
- Electrophoretic tank for small-scale cellulose acetate strips. Albert-Recht. (Demonstration), 281.
- for alkaline isomerisation of fatty acids. Morgan. (Demonstration), 278.
- for coulometric detmns. of free tin and tin-iron alloy on tinplate. Bishop and Hill. (Demonstration), 281.
- for electro-chemical plating of polonium-210 on nickel. Taylor. (Demonstration), 279.
- for precipitating metal sulphides and thiocarbonates with potassium trithiocarbonate as reagent. Johri, 487.
- for preparation of standard gas mixtures. Lacy and Woolmington, 547.
- Fraction collector for chromatography. Clark, 548.
- Further studies on zone-strip technique. Shimi, Imam and Dewedar, 744.
- General-purpose integrating flame photometer. Webb and Wildy. (Demonstration), 281.
- Humidator cells. Powers. (Demonstration), 279.
- Identifying small amounts of bases in urine by infra-red spectrophotometry (— for paper chromatography). Morgan, 631.
- Identifying substances of low volatility by pyrolysis/gas-liquid chromatography. Hewitt and Whitham, 643.
- Illuminator-box for large plate microbiological assays. Naylor. (Demonstration), 282.
- Inclined drawing board fitted with roll of tracing paper for repeated use of a single piece of graph paper. Naylor. (Demonstration), 282.
- Increasing sensitivity of pH meter. Jackson, 76.
- Induction heating applied to micro-detm. of carbon and hydrogen. Butterworth. (Demonstration), 279.
- Inexpensive incubator. Nelson. (Demonstration), 282.
- Lock for high-vacuum —. Parker, 550.
- Magnetically driven fan. Jackson. (Demonstration), 279.
- Microcoulometry. Bishop. (Demonstration), 280.
- Micro-detm. of sulphur in organic compounds (combustion tube). Swift, 621.
- Micro-detm. of sulphur in organic compounds (electrode assembly, combustion supports, ion-exchange column). Dixon, 597.
- Multiple stirrer unit for coagulation tests on water. Packham. (Demonstration), 278.
- Needle-valve weight burette. Dhaneshwar and Short. (Demonstration), 280.
- Obtaining weighed micro samples of moisture- or oxygen-sensitive compounds. Hall. (Demonstration), 279.
- Oxygen flask method: review. Macdonald, 3.
- Potentiometric titrimetry. Dhaneshwar and Short. (Demonstration), 280.
- Preparing small rock salt plates for micro-sampling in infra-red spectrophotometry. Nicholls, 664.

Apparatus—continued

- Qualitative and quantitative analysis of products from pyrolysis. Smith, Wetzel and Kösters, 480.
- Quantitative assessment of psychotropic activity in mice. Parkes. (Demonstration), 278.
- Rapid micro-detm. of nitrogen in fluorine-containing compounds (combustion tube and oxygen generator). Kakabadse and Manohin, 512.
- Recording analytical balance for thermogravimetry. Evans and McAloren. (Demonstration), 278.
- Rocking extractor. Albert-Recht. (Demonstration), 280.
- Sample-admission valve for vacuum fusion apparatus. Still. (Demonstration), 278.
- Sample cell arrangement for E.E.L. flame photometer. Albert-Recht. (Demonstration), 280.
- Semi-automatic compound dilution pipette. Goodall and Taylor. (Demonstration), 279.
- Semi-micro detm. of fluorine and chlorine in organic compounds (— for decomposing gases and volatile liquids). Chambers, Musgrave and Savory, 356.
- Semi-micro molecular pot still. Watt. (Demonstration), 281.
- Semi-micro Orsat —. Moss and Slater. (Demonstration), 278.
- Silica gel chromatography of organic acids from plant tissue (column system). Wager and Isherwood, 260.
- Simple — for continuous sampling of water. Packham, 278.
- Simple gas chromatograph. Barker. (Demonstration), 281.
- Simple illuminated box for incubation of stock cultures of *Ochromonas malhamensis* without overheating. Price and Gare. (Demonstration), 281.
- Small-scale methods of heating and stirring, and small-scale techniques. Fill. (Demonstration), 277.
- Sulphometer for detmng. sulphate in natural waters. Clegg. (Demonstration), 279.
- Titration assembly for acidimetric microbiological assays. Gare and Price. (Demonstration), 281.
- Tungsten-filament katharometer for gas chromatography. Timms and Konrath. (Demonstration), 278.
- Ultrafiltration —. Albert-Recht. (Demonstration), 280.
- Wide-bore dropping-mercury electrode for detmng. dissolved oxygen and oxygen in gases. Briggs and Knowles, 603.
- Apples:** Recommended methods of analysis of pesticide residues in foodstuffs. Detmng. mercury residues in — and tomatoes. Joint Mercury Residues Panel, 608.
- Argon:** Detmng. nitrogen in — by gas chromatography. Murdoch, 856.
- Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
- Arsenic:** Detmng. small amounts of — in organic matter. Society for Analytical Chemistry, Analytical Methods Committee, Metallic Impurities in Organic Matter Sub-Committee. Amendment, 360.
- Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
- Fluorimetric detm. of sub-microgram amounts of selenium (in —). Parker and Harvey, 54.
- in Food (Amendment) Regulations, 1960, 140.
- Oxygen flask method: review. Macdonald, 3.
- Radiochemistry of —. Beard. (Review), 763.

- Simple gas chromatograph. Barker. (Demonstration), 281.
- Tungsten-filament katharometer for gas —. Timms and Konrath. (Demonstration), 278.
- Chromium:** Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
- Direct spectrographic analysis of plant ash. Thompson, 829.
- Radiochemistry of —. Pijck. (Review), 763.
- Separating vanadium and — from iron by extraction of ferric chloride with di-isopropyl ether. Dean and Herringshaw, 106.
- Chromium hydroxide:** Co-precipitation of cobalt with — and aluminium hydroxide in qualitative analysis. Bailey and Broadbank, 485.
- Ciba Foundation:** Quinones in Electron Transport: — Symposium. Wolstenholme and O'Connor. (Publication received), 275.
- Cigarette Smoke Condensate:** Preparation and Laboratory Estimation. Bentley and Burgan. 2nd Edn. (Publication received), 492.
- N-Cinnamoyl-N-phenylhydroxylamine:** Rapid extraction and spectrophotometric detmn. of vanadium with —. Priyadarshini and Tandon, 544.
- Citrate:** Eliminating interfering — and mineral acids in spectrophotometric detmn. of phosphorus in fertilisers. Dahlgren, 814.
- Citronellol:** Detmng. — in admixture with geraniol. Further studies of formylation reactions by gas-liquid chromatography. Holness, 231.
- Clay:** Photometric detmn. of silica in rocks and refractories. Bloxam, 420.
- Clinical Chemistry:** Standard Methods of —. Seligson. Vol. 3. (Publication received), 364; (Review), 759.
- Laboratory: Introduction to the —. MacFate. (Publication received), 764.
- Coal:** Detmng. cellulose and household — in town-refuse compost. Mebius, 821.
- Rapid complexometric detmn. of phosphorus in —. Bhattacharyya, Bhaduri and Banerjee, 195.

Coal-tar distillates: Detmng. dihydroxybenzenes by liquid-liquid partition chromatography. Young, 520.

Cobalt: Co-precipitation of — with chromium and aluminium hydroxides in qualitative analysis. Bailey and Broadbank, 485.

Detmng. — in heat-resistant alloys. Kirtchik and Swearingen, 188.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Ion-exchange separation and polarographic detmng. of small amounts of lead and zinc in presence of —. Carson, 198; Erratum, 492.

Cocaine: Formaldehyde-treated alginic acid in chromatographic detmng. of organic bases. Foster and Murfin, 32.

Identifying small amounts of bases in urine by infra-red spectrophotometry. Morgan, 631.

Cocaine: Formaldehyde-treated alginic acid in chromatographic detmng. of organic bases. Foster and Murfin, 32.

Coffee: Routine detmng. of caffeine in — and — mixtures. Kum-Tatt, 825.

Columbium: See **Niobium**.

Combustion Processes: Gas Sampling and Chemical Analysis in —. Tiné. (Publication received), 428.

Complexes: Analysis of lead tannate and related chelates by amperometric method. Drewes, 104.

Detmng. metals by organic reagents. Holmes. (Summary), 211.

Instability Constants of Complex Compounds. Yatsimirskii and Vasil'ev. Translated by Paterson. (Review), 79.

Compost: Detmng. cellulose and household coal in town-refuse —. Mebius, 821.

Co-ordination Compounds: Proceedings of Symposium on Chemistry of —, Agra, India, February 7th and 8th, 1959. (Publication received), 80; (Review), 624.

Copper: Colorimetric detmng. of — in sea water solutions. Bowles and Nicks, 483.

Colorimetric detmng. of — with zinc *OO*-diisopropyl phosphorodithioate. Forster, Brazenall and Bridge, 407.

Detmng. — in platinum jewellery alloys. Forbes and Dalladay, 418.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Detmng. trace impurities in high-purity selenium. Williams, 172.

Direct absorptiometric detmng. of — in steel and cast iron with 2,2'-biquinolyl. Shanahan and Jenkins, 166.

Direct spectrographic analysis of plant ash. Thompson, 829.

Formate method for simultaneous polarographic detmng. of — and lead in steel. Scholes, 116.

Radiochemistry of —. Dyer and Leddicotte. (Publication received), 428; (Review), 763.

Corrosion: Principles of Metallic —. Chilton. (Publication received), 492.

Coulometry: Coulometric methods in analysis: review. Lewis, 494.

Cream: Changes in composition of — filling of sponges on storage. Wood, 667.

Creatinine: Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.

Crops: See **Plants**.

Crystallometry. Terpstra and Codd. (Publication received), 860.

Curium: Radiochemistry of Americium and —. Penneman and Keenan. (Review), 763.

Cutters: Agar-gel plate immunoanalysis (— for). Feinberg and Temple. (Demonstration), 279.

Cyanocobalamin: Simple illuminated box for incubation of stock cultures of *Ochromonas malhamensis* (for detmng. vitamin B₁₂) without overheating. Price and Gare. (Demonstration), 281.

L-Cysteine: Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.

Orsat apparatus: Semi-micro —. Moss and Slater. (Demonstration), 278.

Osmium: Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Oxalic acid: Detmng. — in urine. Hodgkinson and Zarembski, 16.

Oximinocynoacetate, ethyl: Characterising amines. Adcock, Lawson and Stevens, 615.

Oxygen: Compensation for temperature variations in the cell of dissolved — indicator/recorder incorporating wide-bore dropping-mercury electrode. Littlewood, 359.

Detmng. impurities in chlorine gas by gas chromatography. Lacy and Woolmington, 350.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

flask combustion: Combustion of organic compounds by ignition in oxygen: detmng. carbon and hydrogen. Ingram, 411.

flask method: review. Macdonald, 3.

Lock for high-vacuum apparatus (e.g. detmng. — in metals). Parker, 550.

Measuring — tension of blood by covered platinum electrode. Bishop. (Summary), 212.

Wide-bore dropping-mercury electrode for detmng. dissolved — and — in gases. Briggs and Knowles, 603.

Oysters: Detmng. glycogen in —. Fraser and Holmes, 131.

P

Palladium: Colorimetric procedure for checking — content of jewellery alloys. Johnson, 185.

Detcng. — with p-nitrosodiphenylamine. McAllister, 618.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Pantothenic acid: Maintenance of microbiological assay organisms as freeze-dried cultures. Scholes, 714.

Paper: Laboratory Handbook of Pulp and — Manufacture, incorporating the Fourth Edition of Stevens's "Paper Mill Chemist." Grant. 2nd Edn. (Publication received), 205.

Parabanic acid: Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.

Parathion: See **OO-Diethyl p-nitrophenyl phosphorothionate**.

- Parathion-methyl:** See *OO*-Dimethyl *p*-nitrophenyl phosphorothionate.
- Pediococcus cerevisiae* 8081:** Maintenance of microbiological assay organisms as freeze-dried cultures. Scholes, 714.
- Penicillin(s):** Automatic detmn. of — in fermentation broth: iodimetric assay. Goodall and Davies, 326.
Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.
Iodimetric assay of — in fermented medium. Bethel and Bond, 448.
Micro-quantitative analysis by zone-strip technique. Shimi, el Dein and Imam, 535.
- Penta-acetyl-D-glucose:** Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.
- Pentabenzoyl-D-glucose:** Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.
- Per-esters:** Detcng. organic peroxides. Foxley, 348.
- Peroxides:** Detcng. organic —, Foxley, 348.
Organic —, Davies. (Publication received), 764.
- Pesticides:** Rapid identification and detmn. of residues of chlorinated — in crops by gas-liquid chromatography. Goodwin, Goulden and Reynolds, 697.
Recommended methods of analysis of — residues in foodstuffs. Detmng. mercury residues in apples and tomatoes. Joint Mercury Residues Panel, 608.
See also **Insecticides**.
- Petroleum:** IP Standards for — and Its Products. Part I. 20th Edn. (Publication received), 860.
- pH:** Increasing sensitivity of — meter. Jackson, 76.
Measurement and Titration. Mattock and Taylor. (Publication received), 492.
Measurement of — and electrode potential for analytical purposes. Mattock. (Summary), 284.
- Pharmaceutical Society of Great Britain,** Joint Committee on Methods of Assay of Crude Drugs. Colorimetric detmn. of rotenone, 748.
- Poisons and T.S.A. Guide for Pharmacists in Retail and Hospital Practice.** 6th Edn., revised and extended. (Publication received), 860.
- Pharmacognosy:** Textbook of —. Wallis. 4th Edn. (Review), 141.
- Pharmacopoeia:** British — 1958: Addendum 1960. (Review), 203.
Extra — (Martindale): Supplement 1961. (Publication received), 628.
- Pharmacy:** Pharmaceutical Analysis. Higuchi and Brochmann-Hanssen. (Publication received), 684.
Poisons and T.S.A. Guide for Pharmacists in Retail and Hospital Practice. 6th Edn., revised and extended. (Publication received), 860.
- Phenazone:** See **2,3-Dimethyl-1-phenylpyrazol-5-one**.
- Phenethicillin:** See **α -Phenoxyethylpenicillin**.
- Phenkapton:** See ***S*-(2,5-Dichlorophenylthiomethyl) *OO*-diethyl phosphorothiolothionate**.
- Phenobarbitone:** Separating mixtures of drugs by combination of chromatography and ionophoresis on cellulosic ion-exchange sheets. Street and Niyogi, 671.
- Phenols:** Detmng. dihydroxybenzenes by liquid-liquid partition chromatography. Young, 520.
Thin-layer chromatography of 3,5-dinitrobenzoates. Dhont and de Rooy, 527.
- Phenothiazine:** Detmng. — in commercial preparations by ultra-violet absorption spectroscopy. Brierley and Langbridge, 709.
- α -Phenoxyethylpenicillin:** Microbiological assay of methicillin and phenethicillin by large-plate methods. Jones and Pay, 669.
- Phenoxymethylpenicillin:** Iodimetric assay of penicillin in fermented medium. Bethel and Bond, 448.
- Phenylmercury salts:** Trace detmn. of — and methylmercury salts in biological material. Gage, 457.
- Phorate:** See ***S*-(Ethylthiomethyl) *OO*-diethyl phosphorothiolothionate**.
- Phorate oxygen-analogue sulphone:** Detmng. organo-phosphorus insecticides in vegetables. Laws and Webley, 249.
- Phosdrin:** See **1-Carbomethoxy-1-propen-2-yl dimethyl phosphate**.
- Phosphamidon:** See **2-Chloro-2-diethylcarbamoyl-1-methylvinyl dimethyl phosphate**.
- Phosphate(s):** Colorimetric detmn. of uranium in — rock after extraction with alkyl acid phosphates. Smith and Drewry, 178.
Co-precipitation of — with lead molybdate in British Standard method for detmng. phosphorus in steel. Heslop and Kirby, 134.
Esters in Metabolism: Account of Biologically Important Organic — Compounds. British Drug Houses Ltd. (Publication received), 860.
Precipitation from homogeneous solution by cation release at constant pH. Part II. Precipitation of metal —. Cartwright, 692.
Quinoline phosphomolybdate method for detmng. —: applicability in international trade. Campen and Sledsens, 467.
- Phospholipids:** Enzymic hydrolysis of — for detmng. egg in foods. Griffin and Casson, 544; Erratum, 628.
- Phosphoric acid:** Colorimetric detmn. of uranium in phosphate rock (and —) after extraction with alkyl acid phosphates. Smith and Drewry, 178.
- Phosphorus:** Colorimetric detmn. of — applied to organo — insecticide residues. Caverly and Hall, 478.
compounds: Detmng. organo-phosphorus insecticides in vegetables. General method for insecticide residues. Laws and Webley, 249.
compounds: Identifying substances of low volatility by pyrolysis/gas-liquid chromatography. Hewitt and Whitham, 643.
Co-precipitation of phosphate with lead molybdate in British Standard method for detmng. — in steel. Heslop and Kirby, 134.
Detcng. additional elements in plastic materials by oxygen flask combustion. Haslam, Hamilton and Squirrel, 239.
Detmng. residual organo — insecticides in foodstuffs: review. Chilwell and Hartley, 148.
Detmng. sodium, potassium and — in biological material by radioactivation. Bowen and Cawse, 506.
Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
Direct spectrographic analysis of plant ash. Thompson, 829.
Eliminating interfering citrate and mineral acids in spectrophotometric detmn. of — in fertilisers. Dahlgren, 814.
Esters: Toxic —: Chemistry, Metabolism, and Biological Effects. O'Brien. (Publication received), 206; (Review), 491.
Formation of heteropoly blue by reduction procedures in micro-detmn. of —. Sims, 584.

Phosphorus—continued

Oxygen flask method: review. Macdonald, 3.
Rapid complexometric detmn. of — in coal. Bhattacharyya, Bhaduri and Banerjee, 195.

Phosphorus-32: Detmng. ^{32}C and — in animal tissue and blood fractions by liquid-scintillation. Badman and Brown, 342.

Photometry, flame: See **Flame photometry.**

Physics: Dictionary of Named Effects and Laws in Chemistry, — and Mathematics. Ballentyne and Walker. 2nd Edn. (Publication received), 206.

Handbook of Chemistry and —. Hodgman, Weast and Selby. 42nd Edn. (Publication received), 427.

Piazselenols: Fluorimetric detmn. of sub-microgram amounts of selenium. Parker and Harvey, 54.

Pipette: Aspects of — usage. Part I. Precision. Dean and Herringshaw, 434; Part II. Effects of variables, 440.

Semi-automatic compound dilution —. Goodall and Taylor. (Demonstration), 279.

Plant(s): Detmng. diquat residues in potato tubers (and other crops). Calderbank, Morgan and Yuen, 569.

Detmng. magnesium in — material. Bradfield, 269.

Detmng. organo-phosphorus insecticides in vegetables. General method for insecticide residues. Laws and Webley, 249.

Detmng. zinc in agricultural materials by atomic-absorption spectrophotometry. Allan, 530.

Direct spectrographic analysis of — ash. Thompson, 829.

Eliminating phosphate interference in EDTA detmns. of calcium and magnesium in — ash. Middleton, 111; Erratum, 492.

Rapid identification and detmn. of residues of chlorinated pesticides in crops by gas-liquid chromatography. Goodwin, Goulden and Reynolds, 697.

Silica gel chromatography of organic acids from — tissue. Wager and Isherwood, 260.

Plasticisers: Detcng. additional elements in plastic materials by oxygen flask combustion. Haslam, Hamilton and Squirrel, 239.

Plastics: Applications of gas-liquid chromatography (use in — industry). Haslam, Jeffs and Willis, 44.

Detcng. additional elements in — by oxygen flask combustion. Haslam, Hamilton and Squirrel, 239.

Detmng. water in —. Reid and Turner, 36.

Platinum: Detmng. copper in — jewellery alloys. Forbes and Dalladay, 418.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Poisons and T.S.A. Guide for Pharmacists in Retail and Hospital Practice. 6th Edn., revised and extended. (Publication received), 860.

Laboratory Handbook of Toxic Agents. Gray. (Review), 362.

Polarograph: Trace Techniques Using K1000 Cathode Ray —. Hetman. (Correction), 80.

Polarography: Advances in —: Proceedings of Second International Congress Held at Cambridge, 1959. Longmuir. Vols. 1, 2 and 3. (Publication received), 206; (Review), 625.

Anodic stripping —. Parker and Terry. (Demonstration), 281.

Compensation for temperature variations in cell of dissolved-oxygen indicator/recorder incorporating wide-bore dropping-mercury electrode. Littlewood, 359.

Polarography—continued

Contributi Teorici e Sperimentale di Polarografia. Vol. V. (Publication received), 275; (Review), 555.

Electrodes and cells for —. Lamb and Konczak. (Demonstration), 280.

Polarometrické Titrace. Doležal and Zýka. (Publication received), 364.

Polonium: Radiochemistry of —. Figgins. (Publication received), 764.

Polonium-210: Apparatus for electro-chemical plating of — on nickel. Taylor. (Demonstration), 279.

Polyethylene: Detmng. water in plastic materials. Reid and Turner, 36.

Preparing small rock salt plates for micro-sampling in infra-red spectrophotometry (spectrum of —). Nicholls, 664.

Polymerization: Radical —. Bevington. (Publication received), 684.

Polymers: Detcng. additional elements in plastic materials by oxygen flask combustion. Haslam, Hamilton and Squirrel, 239.

Identifying substances of low volatility by pyrolysis/gas-liquid chromatography. Hewitt and Witham, 643.

Polynucleotides: Natural and Synthetic Nucleic Acids. Steiner and Beers. (Publication received), 427; (Review), 760.

Polysulphides: Detmng. alkali —. Légrádi, 854.

Pork: Nitrogen factors for —. Society for Analytical Chemistry, Analytical Methods Committee, Meat Products Sub-Committee, 557.

Potassium: Detmng. sodium, — and phosphorus in biological material by radioactivation. Bowen and Cawse, 506.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Potassium trithiocarbonate: Apparatus for precipitating metal sulphides and thiocarbonates with — as reagent. Johri, 487.

Potato: Detmng. diquat residues in — tubers. Calderbank, Morgan and Yuen, 569.

Potentiometry: See **Analysis.**

Praseodymium: Detmng. samarium and other rare earths. Pittwell, 137.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Precipitation from homogeneous solution by cation release at constant pH. Part I. Oxidation of EDTA solution by hydrogen peroxide. Cartwright, 688; Part II. Precipitation of metal phosphates, 692.

Pregnane-3,20-diols: Vanillin-perchloric acid reagent for detcng. pregnanetriol and related compounds on paper chromatograms. Few, 636.

Pregn-5-ene-3 β ,20 β -diol: Vanillin-perchloric acid reagent for detcng. pregnanetriol and related compounds on paper chromatograms. Few, 636.

Pregnanetriols: Vanillin-perchloric acid reagent for detcng. — and related compounds on paper chromatograms. Few, 636.

Pregnenetriols: Vanillin-perchloric acid reagent for detcng. pregnanetriol and related compounds on paper chromatograms. Few, 636.

Procaine: Formaldehyde-treated alginate in chromatographic detmn. of organic bases. Foster and Murfin, 32.

Prolabo: See *N'-Diethyl N-1-naphthylpropylene-diamine.*

- Steel:** Co-precipitation of phosphate with lead molybdate in British Standard method for detmng. phosphorus in —. Heslop and Kirby, 134.
- Detmng. tin in pure iron, mild — and low-alloy — by cathode-ray polarography. Scholes, 392.
- Direct absorptiometric detmn. of copper in — and cast iron with 2,2'-biquinoly. Shanahan and Jenkins, 166.
- Formate method for simultaneous polarographic detmn. of copper and lead in —. Scholes, 116.
- Stenadienols:** Reactions of steroids with acetic anhydride and sulphuric acid (Liebermann-Burchard test). Cook, 373.
- Stenatrienols:** Reactions of steroids with acetic anhydride and sulphuric acid (Liebermann-Burchard test). Cook, 373.

Sterols: Reactions of steroids with acetic anhydride and sulphuric acid (Liebermann - Burchard test). Cook, 373.

Steroids: Application of infra-red spectroscopy to problems of medical science. Kellie. (Summary), 212.

Reactions of — with acetic anhydride and sulphuric acid (Liebermann - Burchard test). Cook, 373.

Vanillin - perchloric acid reagent for detcng. pregnanetriol and related compounds on paper chromatograms. Few, 636.

Sterols: Reactions of steroids with acetic anhydride and sulphuric acid (Liebermann - Burchard test). Cook, 373.

Still: Automatic pre-heating self-flushing water —. Dhaneshwar and Short. (Demonstration), 280.

Semi-micro molecular pot —. Watt. (Demonstration), 281.

Stirring: Multiple stirrer unit for coagulation tests on water. Packham. (Demonstration), 278.

Small-scale methods of heating and —, and small-scale techniques. Fill. (Demonstration), 277.

Streptococcus faecalis: Maintenance of microbiological assay organisms as freeze-dried cultures. Scholes, 714.

Streptomycin: Chromatographic reagents for organic substances. Cadenas and Deferrari, 132.

Strontium: Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

General-purpose integrating flame photometer (detmng. — in calcium). Webb and Wildy. (Demonstration), 281.

Radiochemistry of Barium, Calcium and —. Sunderman and Townley. (Review), 763.

Strontium-90: Detmng. — in rain water. Osmond, Healy and Marshall, 616.

Strychnine: Formaldehyde-treated alginic acid in chromatographic detmn. of organic bases. Foster and Murfin, 32.

Identifying small amounts of bases in urine by infra-red spectrophotometry. Morgan, 631.

Sugars: Micro-quantitative analysis by zone-strip technique. Shimi, el Dein and Imam, 535.

Sulphacetamide: Separating mixtures of drugs by combination of chromatography and ionophoresis on cellulosic ion-exchange sheets. Street and Niyogi, 671.

Sulphadiazine: Spectrophotometric detmn. of —, sulphamerazine and sulphathiazole in mixtures. Marzys, 460.

Sulphamerazine: Spectrophotometric detmn. of sulphadiazine, — and sulphathiazole in mixtures. Marzys, 460.

Sulphanilic acid: Detmng. aromatic amino-compounds. Daniel, 640.

Sulphate(s): Detmng. dithionate, sulphite and — in manganese leach liquors. Soffer, 843.

Detmng. microgram amounts of sulphur-containing compounds. Skerrett and Dicks, 69.

Sulphometer for detmng. — in natural waters. Clegg. (Demonstration), 279.

Volumetric detmn. of —. Ashbrook and Ritcey, 740.

Sulphathiazole: Spectrophotometric detmn. of sulphadiazine, sulphamerazine and — in mixtures. Marzys, 460.

Sulphide(s): Apparatus for precipitating metal — and thiocarbonates with potassium trithiocarbonate as reagent. Johri, 487.

Detmng. alkali polysulphides (and —). Légrádi, 854.

Sulphide(s)—continued

Detmng. microgram amounts of sulphur-containing compounds. Skerrett and Dicks, 69.

Thioformanilide as precipitant for metal —. Antia, Arora and Bhatnagar, 202.

Sulphite: Detmng. dithionate, — and sulphate in manganese leach liquors. Soffer, 843.

Sulphometer. Clegg. (Demonstration), 279.

Sulphonamides: Spectrophotometric detmn. of sulphadiazine, sulphamerazine and sulphathiazole in mixtures. Marzys, 460.

Sulphonates: Collaborative work on detmng. alkylbenzene — in sewage, sewage effluent, river waters and surface waters. Bolton, Webster and Hilton, 719.

Detmng. biologically soft and hard alkylbenzene — in detergents and sewage. Ogden, Webster and Halliday, 22.

Sulphonic acids: Characterising organic acids by benzylamine salts. Cheeseman and Poller, 256.

Sulphur: Detcng. additional elements in plastic materials by oxygen flask combustion. Haslam, Hamilton and Squirell, 239.

Detmng. alkali polysulphides (and —). Légrádi, 854.

Detmng. microgram amounts of — containing compounds. Skerrett and Dicks, 69.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Direct titration of hydrolysable — in organic compounds. Wronski, 543.

Micro-detmn. of — in organic compounds. Dixon, 597; Swift, 621.

Oxygen flask method: review. Macdonald, 3.

Turbidimetric detmn. of elemental —. Hart, 472.

Sulphur dioxide: Indirect ultra-violet spectrophotometric detmn. of — by means of plumbous ion. Blinn and Gunther, 675.

Surface-active agents: Collaborative work in detmng. alkylbenzenesulphonates in sewage, sewage effluent, river waters and surface waters. Bolton, Webster and Hilton, 719.

Detmng. biologically soft and hard alkylbenzenesulphonates in — and sewage. Ogden, Webster and Halliday, 22.

Surgical Research Society: Tools of Biological Research. Atkins. 3rd Series. (Publication received), 628; (Review), 859.

W

Wastes: See **Effluents**.

- Water:** Collaborative work on detmng. alkylbenzenesulphonates in sewage, sewage effluent, river — and surface —. Bolton, Webster and Hilton, 719.
Detmng. nitrite in —. Montgomery and Dymock, 414.
Detmng. ⁹⁰Sr in rain —. Osmond, Healy and Marshall, 616.
Detmng. — in plastic materials. Reid and Turner, 36.
Development of Brewing Analysis. Hudson. (Review), 272.
sea: See **Sea water**.
Sulphometer for detmng. sulphate in —. Clegg. (Demonstration), 279.

Water—continued

- Toxicology of nitrates and nitrites with particular reference to potability of — supplies: review. Burden, 429.
- Wetting agents:** See **Surface-active agents**.
- Wine:** Iodimetric detmn. of acetaldehyde bisulphite (e.g. in —). Burroughs and Sparks, 381.
Presence of acrolein in Rhine —. Liebfraumilch 1959. Avent, 479.
- Wort:** Development of Brewing Analysis. Hudson. (Review), 272.

X

- Xenon:** Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
- X-Ray** Absorption and Emission in Analytical Chemistry. Liebhafsky, Pfeiffer, Winslow and Zemany. (Publication received), 205; (Review), 626.
Analysis of Organic Structures. Nyburg. (Publication received), 364.
fluorescence in general analysis. Bromley. (Summary), 283.
fluorescence: Radioactive isotopes in simple — analysis. Mellish. (Summary), 283.
Microscopy. Cosslett and Nixon. (Publication received), 142; (Review), 423.
- Xylidenes:** Detmng. aromatic amino-compounds. Daniel, 640.

Y

- Yeast:** Arsenic in Food (Amendment) Regulations, 1960, 140.
- Ytterbium:** Detmng. samarium and other rare earths. Pittwell, 137.
Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
- Yttrium:** Detmng. samarium and other rare earths. Pittwell, 137.
Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
Radiochemistry of the Rare Earths, Scandium, —, and Actinium. Stevenson and Nervik. (Publication received), 427; (Review), 763.

Z

- Zinc:** Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.
Detmng. trace impurities in high-purity selenium. Williams, 172.
Detmng. — in agricultural materials by atomic-absorption spectrophotometry. Allan, 530.
Detmng. — in metallurgical materials by atomic-absorption spectrophotometry. Gidley and Jones, 271.
Detmng. — in zinc manganese ferrite and other ferrites. Andrew and Nichols, 676.
Direct spectrographic analysis of plant ash. Thompson, 829.
Ion-exchange separation and polarographic detmn. of small amounts of lead and — in presence of cobalt. Carson, 198; Erratum, 492.
Oxygen flask method: review. Macdonald, 3.
Radiochemistry of —. Hicks. (Publication received), 275; (Review), 763.
- Zinc amalgam:** Polarographic detmn. of dimethyl and dibutyl phthalates in propellants with — to overcome interference from nitroglycerine. Townsend and Macintosh, 338.

Zinc OO-di-isopropyl phosphorodithioate: Colorimetric detmn. of copper with — (and prepn. of —). Forster, Brazenall and Bridge, 407.

Zinc manganese ferrite: Detmng. zinc in — and other ferrites. Andrew and Nichols, 676.

Zirconium: Colorimetric detmn. of tin in propellants by haematoxylin (and detmng. —). Norwitz, 835.

Detmng. trace elements by fast-neutron activation analysis. Coleman, 39.

Radiochemistry of — and Hafnium. Steinberg. (Review). 763.

ERRATA:

VOL. 86, 1961:

p. 113, 13th line under "Reagents." For "*Ammonia solution, 50 per cent. w/v*" read "*Ammonia solution —Ammonia solution, sp.gr. 0.880, diluted (1 + 1).*"

p. 200, 28th and 29th lines (the acknowledgements). *Delete* all words after "Note."

Note by F. J. Griffin and C. B. Casson, p. 544, Table I, 4th column, 5th line. For "*0.125*" read "*0.0125*."

p. 544, Table I, 4th column, 6th line. For "*0.466*" read "*0.0466*."

p. 544, last paragraph, 3rd line. For "*0.341*" read "*0.0341*."
